PSU PrecisionSprayUnit

Release agents at a glance

Pharmaceuticals

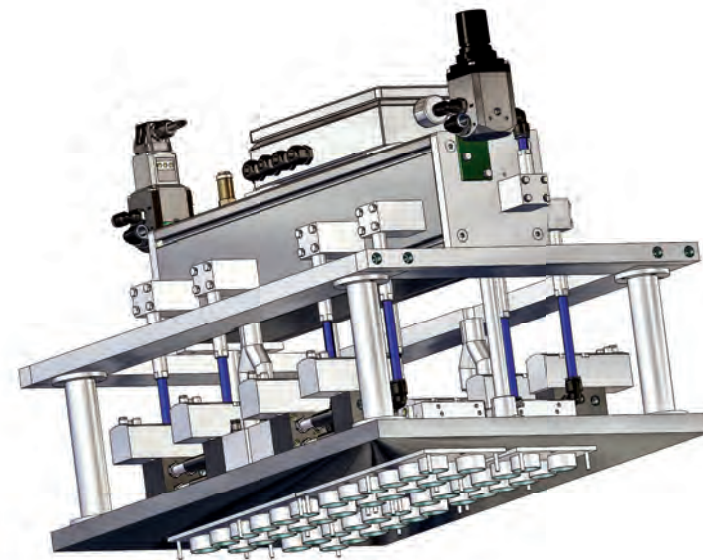

PSU PrecisionSprayUnit

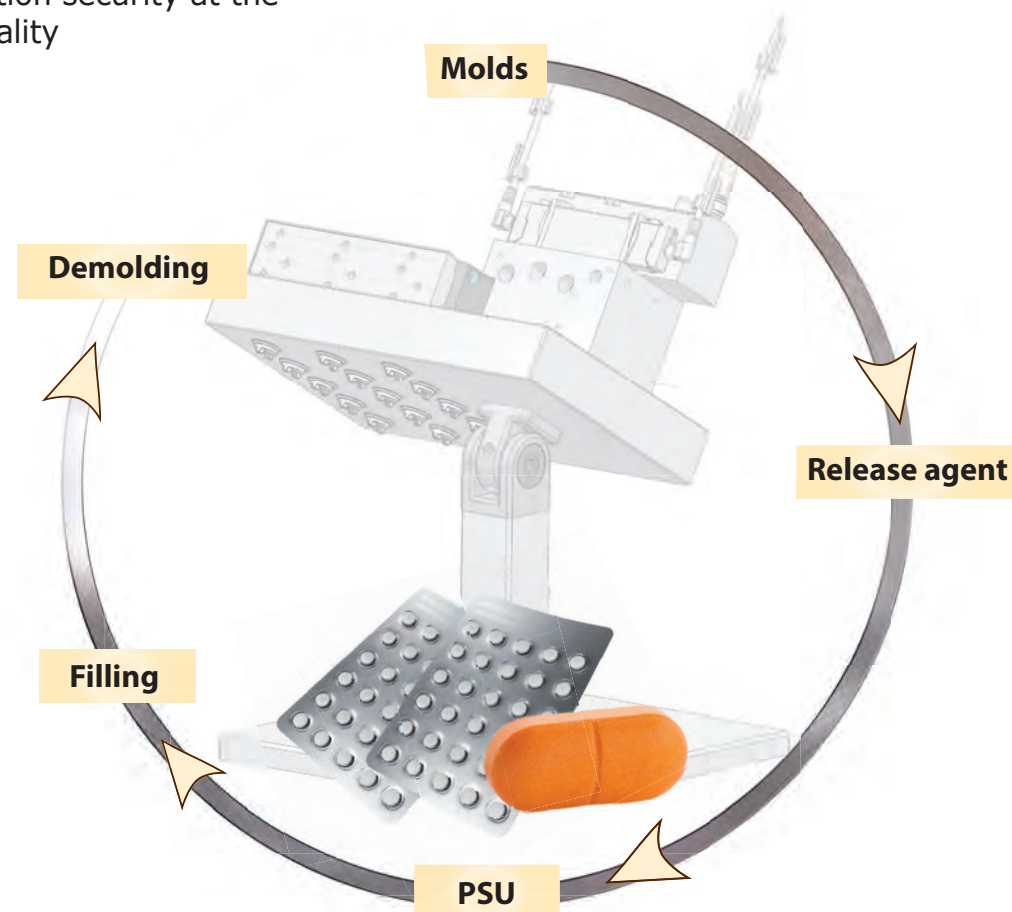

Benefits of choosing the **PSU** in comparison with conventional MOGUL technology:

- no costly production of forming pins/dies
- reduction in scrap
- reduction in the cost per unit
- fewer steps in the process (see scheme)
- time saving results in optimal capacity utilisation
- stable production security at the same high quality

PSU PrecisionSprayUnit

individually adjustable to customer-specific product moulds, the size of the plant, and output

Release agent

This product contains: vegetable oils, lecithin, antioxidant
Application: high-quality release agent for use on all tins and surfaces.
Features: stable at a range of temperatures, resistant to oxidation

This product contains: vegetable oils, lecithin, antioxidant
Application: this release agent is very effective in releasing coated pills and lozenges.
Features: provides long-term resistance to oxidation

This product contains: vegetable oils, waxester, lecithin, antioxidant
Application: high-performance release agent for use in the manufacture of pharmaceutical products, such as lozenges, coated pills, and sweets
Features: high-performance release wax, resistant to oxidation

This product contains: vegetable oils, antioxidants
Application: ideal release agent for use in lower production temperatures in the manufacture of pharmaceutical products.
Features: stable at low temperatures

This product contains: organic vegetable oils, lecithin
Application: organic release agent for use on all surfaces and tins*
Features: stable at a range of temperatures, resistant to oxidation
