

PSU / PrecisionSprayUnit

Confectionery / Pharma

Technical data

Cavity size:	from 6 mm Ø
Cavity configuration:	custom
Product shape:	custom
Number of cavities per shape:	custom
Product rotation time:	from 1 second
Spray volume / cavity:	from 1/1000 ml
Viscosity:	0.5 - 2500 mPas
Cycle time:	from 0.5 seconds
Length/width/height:	custom

Features

PSU - PrecisionSprayUnit

for automatic spraying of any shapes, cavities, trays and objects

Adjustable spray quantities

even finish with fine edge definition, accurate with the chosen quantity of release agent

DÜBÖR spray valves

tried-and-tested Airmix spraying technology for all batch sizes and cycle times

For constant production - 24/7

double to triple production volume/time compared to Mogul systems

High-grade design and materials

food-grade approval for all components in contact with release agent

For all glutinous confectionery

fruit and wine gums, jelly, fondant, liquorice, mousse, foam, brittle, fruit mixture, caramel

Creative product design available

suitable for the production of all-over formed and structured products - even in blister packs

Low investment and operating costs

no powder cycles or drying rooms required; no ATEX regulations

DÜBÖR®
